

A MORE FLEXIBLE SOLUTION

PEDESTRIAN BARRIER

Keep danger and people well away from each other with A-Safe Pedestrian Barrier.

In a busy, often confusing environment, like a factory or warehouse, it is vitally important that employees, visitors and customers always know where they are safe.

Due to the highly visible nature of these safety barriers designated walkways are clearly marked out enabling people to see, at a glance, where they should and should not be.

They are ideal for identifying and protecting storage areas, machinery and equipment and for denying access to places that are potentially hazardous.

MAYNARD ALLSOP

Health, Safety & Facilities Manager,
ASDA SAC1, Lutterworth

We have trialed and tested the A-Safe plastic barrier protection system since its inception.

It is an unusual product, in as much as it does what its technical literature says it will!

We have found it easy to install, it looks the part and requires no maintenance.

MAKE SURE YOU ARE COMPLIANT WITH
HSC WORKPLACE REGULATIONS 1992 AND
EC WORKPLACE DIRECTIVE 89/654/EEC

- Ideal for defining and protecting pedestrian walkways
 - High impact resistance
